

## **Piet de Groen**

Dr. Piet de Groen is consultant in Gastroenterology and Hepatology at the Mayo Clinic in Rochester, Minnesota, with a joint appointment in the Division of Biomedical Informatics. He is Professor in Medicine at Mayo Clinic College of Medicine. His clinical practice and research interests are focused on diagnosis and treatment of patients with primary liver cancers and endoscopic assessment and treatment of colon lesions including polyps and cancer. In addition Dr. de Groen has an interest in biomedical informatics. He has led the development of web-based databases and applications for the Mayo Clinic Cancer Center in Rochester and currently is the Program Director at Mayo Clinic Rochester of the Mayo Clinic/IBM Computational Biology Collaboration which is developing a comprehensive prototype system (the Mayo Clinic Life Sciences System) for access to and interpretation of clinical, genomic as well as proteomic data.
